

To Whom It May Concern:

I have been a loyal listener and supporter of XM radio for almost two years. In those two years I have been nothing but impressed by the quality and quantity of choices I have at my disposal everyday. I spend my hard earned money on this choice to listen to satellite radio and have encouraged many of my friends and colleagues to subscribe. I remind you, this is a CHOICE that I choose. If you or any organization tries to impede that choice, you are violating my freedom of speech guaranteed to me by the First Amendment. Furthermore, XM is not the only satellite radio it is simply the best. Last time I checked, innovation and competition is what makes the country great. In a struggling economy, XM stock has shown a vitality that few have and continues to have new subscribers daily.

Please, I implore you to not stop XM's right to decimate information and entertainment in a competitive market because doing so is inherently unAmerican and also illogical.

Thank you for your consideration.
